# ALLISON LOO

+6586887955 | allison.loo.2025@computing.smu.edu.sg | LinkedIn | Github

## ADDITIONAL INFORMATION

Year 2 Information Systems student with hands-on experience building and deploying full-stack web applications. Experienced in TypeScript, React/Next.js, API development, and relational database design, with production systems serving real users.

## EDUCATION

**Singapore Management University (SMU)** — **Singapore**
*Bachelor of Science (Information Systems)* — **Aug 2025 - Present**

- SMU Merit Scholarship Recipient
- ***Relevant Coursework:*** *Algorithms and Programming (Data Structures), Web Application Development (VueJS/HTML/CSS), Database Management*

**Singapore Polytechnic** — **Singapore**
*Diploma in Information Technology (Software Development)* — **Apr 2022 - May 2025**

- cGPA: 3.93 / 4.0 (Diploma with Merit - Top 10%)
- SoC Director's Honor Roll 22/23 to 23/24
- CCA Gold with Honours
- ***Relevant Coursework****: Front-end Development, Java Programming, Database Engineering, Object-Oriented Programming, Java Enterprise Solutions Development, Back-End Development*

## RELEVANT EXPERIENCE

**CORDYSG -** *Co-Technical Lead (APP)*
(Private Repo | app.cordy.sg) — Singapore | **Mar 2025 – Present**

- Architected and deployed a modular full-stack system using TypeScript, tRPC, and Prisma with enforced type safety across client-server boundaries.
- Designed normalized relational schemas (PostgreSQL) with explicit validation and integrity constraints
- Defined and maintained stable API contracts to ensure predictable system behavior across user roles
- Built authenticated user flows with role-based permissions (NextAuth, Supabase Auth)
- Iteratively refactored system components to improve modularity, reduce coupling, and support feature expansion such as Chrome Extensions, Chatbots, No-code platform expansion, etc.
- Deployed and maintained live application with 10k+ active users, debugging and resolving issues post-launch

**Great Eastern -** *Creative Prototype Intern (Technology)*
(Private Repo | Prototype shown in SFF2024 (IPad Ver.) — Singapore | **Sep 2024 - Feb 2025**

- Designed and prototyped structured event and configuration systems enabling dynamic event flow definition without modifying core system logic
- Implemented class-based models to support extensible event and question components
- Built and maintained scalable frontend architecture using Vue.js
- Translated conceptual product ideas into modular, maintainable technical implementations

**Final Year Project Lead — System & Component Architecture**
*School project (GitHub) NPM: Link* — Singapore | **Apr 2024 – July 2024**

- Independently designed and published a reusable internal design system as a versioned npm package
- Defined strict TypeScript component interfaces to enforce type safety across consuming modules
- Structured component boundaries to maintain modularity and prevent tight coupling
- Led implementation and refactoring to ensure scalability and maintainability

## TECHNICAL SKILLS

- **Programming Languages:** Java, Javascript, Typescript, Python (Basic)
- **Databases:** PostgreSQL, SQL
  **Backend:** Node.js, REST APIs, tRPC
- **Tools & Environment**: Git, Prisma ORM
- **Frameworks**: React.js, Next.js, Vue.js, HTML/CSS

## COMPETITIONS

- SMU (dot)Hackathon 2025 - First Place
- Ellipsis Tech Series Hackathon 2025 - 2nd Place
- SMU Hult Prize Qualifiers 2026 - 3rd Place (CORDY)
